Dear Ms. Brown:

We respectfully request that the **Construction Carpentry Techniques** program be moved from the Program Standard - Construction Techniques (MTCU code 48200) to the Program Standard - Carpentry and Renovation Techniques (MTCU code 47600).

On September 20, 2016 we received notification from the Ministry regarding the release of new Program Standards for Construction Techniques (MTCU code 48200) and Construction Engineering Technician (MTCU code 58200). After completing a review of the new Program Standard for Construction Techniques, we would like to appeal the placement of our Construction Carpentry Techniques program within the MTCU code 48200. Our program as it is currently being delivered is focused on residential construction and renovation and, therefore, better aligns with the Vocational Learning Outcomes (VLOs) for the Program Standard Carpentry and Renovation Techniques (MTCU code 47600).

To support our appeal, we have included a detailed description of how the program does not meet the VLOs of the approved Program Standard (48200) and how it does meet the VLOs of the approved Program Standard for Carpentry and Renovation Techniques (MTCU code 47600). Descriptions of courses offered in the program are also included, in addition to a program map indicating course sequencing.

We trust your review of the attached documentation will support our request to move the Construction Carpentry Techniques program from the Program Standard - Construction Techniques (MTCU code 48200) to the Program Standard - Carpentry and Renovation Techniques (MTCU code 47600). If the appeal is granted, we would commit to an implementation date of September 2017.

Yours sincerely,

Peter Devlin, President
